New York, NY · theahposey@gmail.com · theaposey.com · linkedin.com/in/thea-posey

Data-driven product manager and designer. I own Coachtopia's product roadmap, and building 0→1 products with AI led to an innovation track for our team, where I now lead how we bring AI into our workflows. I also work on Tapestry's international strategy, using data and research to grow our digital businesses abroad. Off the clock, I built and launched Pieces, a wishlist and curation app on the App Store, and write about how my friends shop on Substack.

EXPERIENCE

Associate Product Manager, Tapestry — New York, NY

Coachtopia — Jul 2024 – Present

- Own Coachtopia's product roadmap across e-commerce and the NFC Digital Product Passport, leading partnerships with EON, Poshmark and Depop.
- Shipped Instant Resale, turning one tap into a prefilled Poshmark listing, and scaled it to all of Coach. 20k+ items listed and +62% 30-day sell-through vs. manual listings, opening Coach's first royalty revenue from peer-to-peer resale.
- Independently prototyped and user-tested selling used products on site with 10 Gen Z shoppers; all 10 responded positively, reversing an earlier Coach study on used-product sentiment and informing Coachtopia's partnership with Depop.
- Built TEPIC Flash (0→1) with Claude Code, cutting projected carbon and waste calculation time by ~85% per collection drop. Calculations matched Tapestry's existing tool on every figure, clearing the way to scale across all brands and release it open source, further establishing Tapestry as a pioneer in sustainability.
- Took Margo—a scrap-leather design app—from AI prototype to production with engineering, using prototypes tested with design teams to set requirements and the MVP. Expected to cut planning rounds from up to 2 weeks to days and optimize scrap usage to produce more units.

Tapestry International Strategy — Aug 2026 – Present

- Found Japanese shoppers are 2× more likely to check store inventory than add to cart, explaining a 67% online conversion gap vs. the U.S. Turned the insight into omnichannel KPIs and AI-built prototypes that won leadership buy-in and secured a partnership with LINE.

Assistant E-Commerce Manager (part-time), Tapestry — Sep 2023 – Jun 2024

Coachtopia

- Owned Coachtopia merchandising and operations; used site behavior and sales data to redesign Coachtopia's site navigation and launch new shops that consistently ranked in the site's top five by clicks and conversion.

Business Insights & Operations Intern, Tapestry — May 2023 – Aug 2023

- Supported data migration initiative by rebuilding customer scorecards and KPI dashboards in Tableau.
- Introduced the team to ChatGPT and used it to automate a recurring analysis with Python.

PROJECTS

Pieces, Founder · *savepieces.com · live on the App Store* — May 2026 – Present

- Designed, built and launched Pieces, an app for saving and organizing the things you own and intend to own, solo, going from first build to the App Store in 17 days.
- 64% of early users came back a week later, over 3× the typical consumer app, rising to 92% for users who save 5+ pieces.
- Tracked every interaction in PostHog, gathered feedback and ran surveys to identify unexpected usage patterns, and turned them into features.

EDUCATION

B.S. Business Analytics, Pace University, Honors College — Sep 2020 – May 2024

- Honors thesis, *The Digitization of Luxury Fashion*, analyzed 14K tweets to see how shoppers felt about luxury's digital bets, why most didn't stick, and what could. Prototyped an app that links products to digital ownership.

SKILLS AND TOOLS

Product & Research	JIRA, Figma, PlaybookUX
Data	SQL (Snowflake, BigQuery), GA4, PostHog, Tableau, Excel
AI & Build	Claude, Claude Code, SwiftUI, Supabase, Vercel, GitHub
Languages	English (native), Indonesian (proficient), Mandarin (elementary)
